

Zeppelin International to utilize Workforce Optimization Solutions from Immersive Technologies

12 August 2020

Zeppelin International, one of the largest Caterpillar® Dealers in Europe and CIS region, with the support of technology and services from Immersive Technologies, is set to provide comprehensive training for both green and experienced personnel operating a range of [Caterpillar truck models](#) within the Navoi mine site. This marks the 45th country globally that utilizes Immersive Technologies workforce optimization training solutions.

Simulator-based training establishes a safe environment for experienced operators to expand their expertise, and a risk-free arena for entry level operators to start developing their skills. Zeppelin International has also acquired Immersive Technologies [Custom Mine Site \(CMS\)](#) technology to further train those unfamiliar with the new machinery in a familiar training environment. The program will aid in increasing workforce optimization in the areas of production efficiency and operational safety, while ensuring operators are confident and highly productive when they enter actual site operations.

CMS allows detailed focus to be placed on training requirements specific to each site such as land marks, specific mine site road rules and environmental conditions. Curriculum tailoring to target specific learning outcomes is managed effortlessly with the support of Immersive Technologies [Professional Services](#), delivered on-site via specialist training experts.

"At Zeppelin we have high expectations from Immersive Technologies based on previous results and experiences. They have successfully completed the installation development and will be providing professional services to increase production efficiency and overall safety for the mine site. Utilising this technology and targeted curriculum will aid in increasing output from Navoi's current headcount." Says **Stanislav Kondratenko**, Technical Director of Zeppelin Central Asia Machinery LLC.

*"Immersive has been developing and delivering training solutions for Caterpillar equipment for over 27 years. Our [IM360 Simulator](#) and [Conversion Kits® for Cat® truck models](#), will provide the ultimate simulation for Zeppelin and the Navoi mine site to optimize production output and safety. This is yet another example of the successful collaboration between Immersive Technologies and OEM Dealers around the world" - **Oleg Lyuty**, Business Development Advisor at Immersive Technologies.*

Navoi NMMC and Immersive Technologies Managed Services Staff with the site's newly commissioned IM360-^B High Fidelity Simulator.

Zeppelin has also acquired [TrainerAdvantage™](#) certification program that includes classroom and hands-on sessions working with the simulator under the instruction of an Immersive Technologies Certified Instructor.

Regional Vice President of EMEA & CIS **Johan Stemmet** has expressed his excitement in seeing production and safety increases with the introduction of Immersive Technologies training solutions into Uzbekistan.

"Innovation is the future. Production optimization is unthinkable without innovative technologies. I look forward to seeing how the introduction of this level of training increases productivity and safety for Zeppelin International and Navoi NMMC."

###

About Immersive Technologies

Immersive Technologies is the world's largest, proven and tested supplier of surface and underground Advanced Equipment Simulators to the global mining industry. The company has achieved this unique position by focusing on its mission to increase Customer profitability by optimizing the safety and productivity of their operators. Immersive Technologies' Advanced Equipment Simulators are helping hundreds of mining companies around the world to increase their equipment operators' safety and site profitability through effective simulation training.

With advanced simulator modules deployed in 45 countries, Immersive Technologies is dedicated to provide outstanding service. To deliver on this commitment the company has customer sales and support offices located close to its customers in Perth and Brisbane Australia, Salt Lake City USA, Fort McMurray, Vancouver Canada, Monterrey Mexico, Lima Peru, Santiago Chile, Belo Horizonte Brazil, Bochum Germany, Johannesburg South Africa, Jakarta Indonesia, Kolkata India and Moscow Russia.

Immersive has the global mining experience, innovative technology, product range, OEM relationships, proven support commitment and industry vision to partner with you to ensure your simulator training solution delivers the significant results you expect.
