REMOTE SUPPORT SERVICES

MONITOR TRAINING PROGRAMS &
SIMULATOR ASSET UTILIZATION REMOTELY

COMPARE OPERATOR PERFORMANCE
ACROSS MULTIPLE SITES

As an integral part of Immersive Technologies' Complete and Scalable Solution, SimCloud provides even better support services along with the ability to manage Advanced Equipment Simulator training programs remotely and more efficiently.
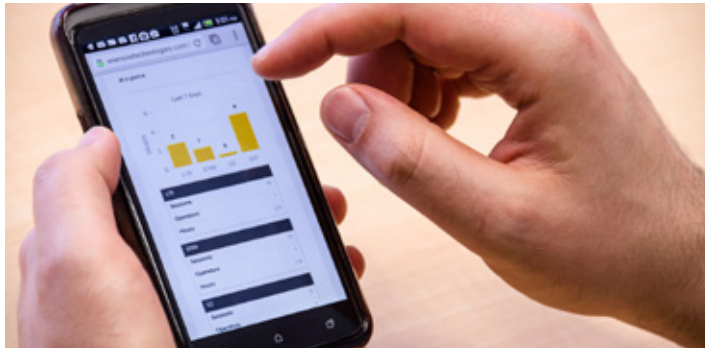

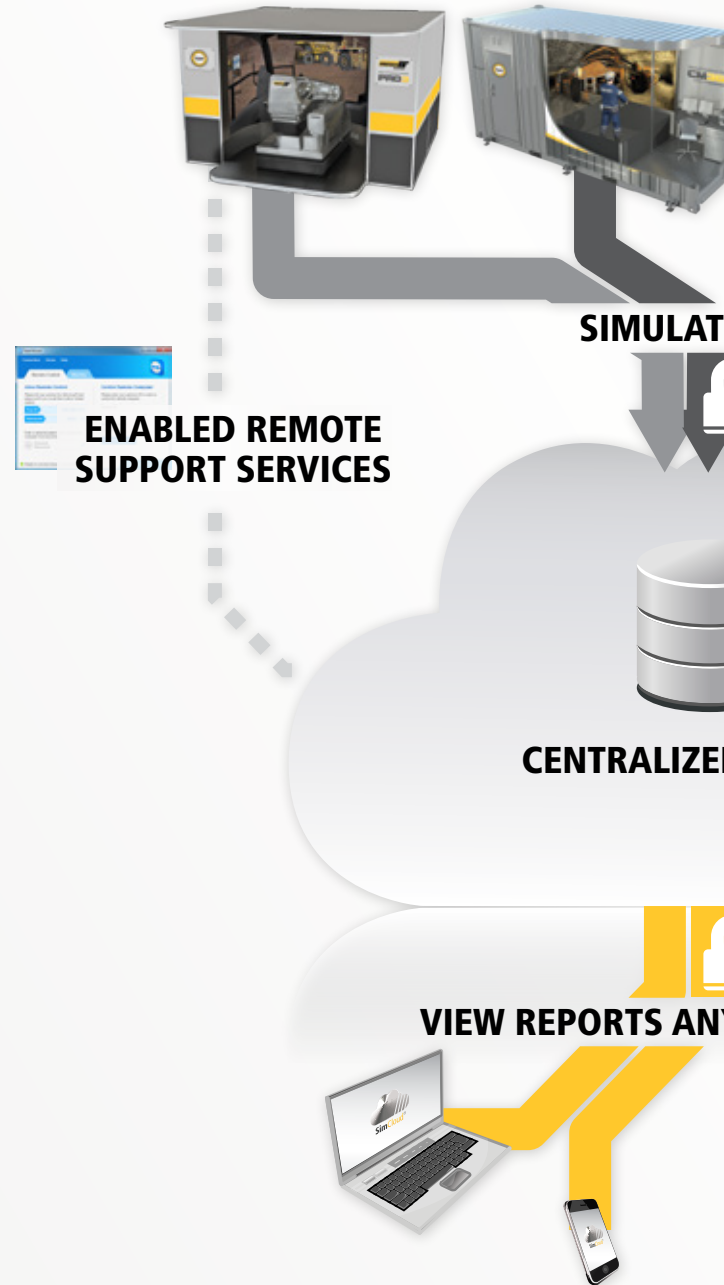

# SimCloud®
## Remote Simulator Management System

## What is SimCloud?

SimCloud is a web-based product that allows easy and secure access to your simulators enabling remote support services and visibility over your local and global simulation training activities. Through SimCloud, Immersive Technologies' Technicians and Training Consultants can access simulator PCs from a remote location to identify and resolve specific issues quickly eliminating any unnecessary down-time of your simulator training programs. Via SimCloud secure login you can access your simulator data securely allowing you to have visibility over your simulation training activities.

## How SimCloud Works

SimCloud utilizes a secure internet connection that allows you to connect to simulator PCs. Data is securely transferred to a central database. All personal information is encrypted during the transfer process to protect your sensitive data.

## Remote Support Services

Your Customer Service Technician or Training Consultant can now access simulator PCs from a remote location allowing efficient identification & resolution of specific issues. Compared to the traditional method of talk/walk through, SimCloud significantly reduces the time to identify issues allowing for faster problem resolutions and eliminating unnecessary down-time of your simulators.

## Remotely monitor
### training programs and Simulator asset utilization

Remotely monitor the utilization of your simulator training programs across multiple sites anywhere, anytime. This allows identifying utilization issues early-on & rectifying them quickly, enabling efficient training.

# TOOLS AND TECHNOLOGIES

Immersive Technologies is the proven and tested leader in delivering operational performance from your most valuable asset, "Your People."

Our complete solution, including a blended learning approach spanning eLearning to High Fidelity Simulators, coupled with tool and technologies to deliver measurable value is scalable to suit your demands now and in the future.

Our access to an extensive global operator performance database and cloud technology ensures our customers are always at the forefront of operator development.

### Global Operator Benchmark
Benchmark your operators against global norms.

### Trainer Productivity Station
Do more with the experienced trainers you already have.

### SimDesktop
Analyze your operator development, data and configure scenarios anywhere, anytime.

### SimMentor™
Increase training effectiveness and efficiency using integrated brief/debrief technology.

## Compare Operator Performance
### across multiple sites

Merge data from all your simulators easily to do consolidated reports in an efficient manner. This allows you to analyze data including comparison of operator performance between sites via SimDesktop.

## Automatic notification
### of useful reports

Subscribe yourself or others to receive automatic notification of useful high-level reports regarding how the simulators are being utilized with little or no effort. This frees up trainers from manual report generation and allows them to remain focused on their core functions.
