## Managing Operator Variance

This one-day course equips participants with the knowledge and skills necessary to effectively manage operator variance within their organization. Participants will learn to identify root causes and implement strategies for variance reduction through interactive lectures, group discussions, case studies, and practical exercises.

## Achieving Training Excellence

This two-day workshop demonstrates how successful training requires trainers to understand how their training objectives link to broader organizational objectives. Participants will learn to tailor their approach to individual needs and learning styles and deliver highly technical concepts in an impactful manner.

Managing Operator Variance

Achieving Training Excellence

## Mine Alignment – Busting Silos

This one-day workshop tackles inefficiencies caused by poor communication and collaboration within mining operations. Participants will learn to develop robust communication plans, align departmental goals with organizational objectives, and establish steering committees for coordinated decision-making.

## Leading Workforce Digital Transformation

This one-day course empowers mining industry leaders and managers to navigate and manage the digital transformation of their workforce. Participants will learn about change management, technology adoption, and workforce development with a focus on integrating Autonomous Haulage Systems (AHS).

### Delivery Options:

**In-Person Delivery at Your Location:** The course will be facilitated at your location with the people you need to be aligned with. This method helps teams form a deeper understanding and improves alignment of communication and expected workforce development outcomes. This offering is available upon demand.

**Hosted at an Immersive Technologies Office:** The course will be facilitated at an Immersive location and will be open to other mining industry professionals. This method is effective when you only need 1 or 2 people enrolled or if you need to get away from the distractions at the job site. It also facilitates learning from across multiple mines so different viewpoints are heard. This offering is available multiple times per year in regional Immersive offices.

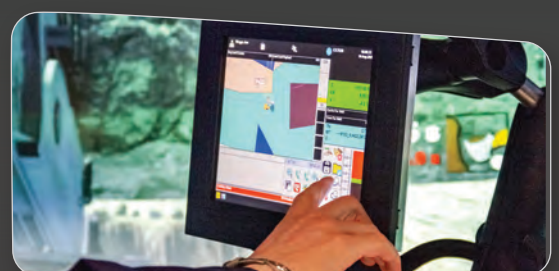

### Customer Testimonial

“ This course was a great opportunity for our trainers and leaders to engage in identifying the types of variances and developing an approach on improvements. ”
