SimControl 2023.2

IMMERSIVE TECHNOLOGIES

IMMERSIVE TECHNOLOGIES

EXPECT RESULTS

Get the most out of your simulator purchase with the latest version of SimControl - including vital updates and new functionalities.

- **Trainer & Platform Features**
  - Photo-realistic Dozer and Wheel Loader graphics on PRO5 simulators
  - 'Driving to conditions' training– includes improvements to weather events that reduce driver visibility for Dozers and Wheel Loaders
  - Pre-Start Inspection – New reporting fields improving operator performance benchmarking

- **Surface and Underground Mining Features**
  - Sustainability Training – Fuel efficiency features available for more trucks. New data fields have been added to better track fuel consumption
  - Enhanced Haul Truck Usability and Realism - Optimizing haul truck simulations to enhance operator training in a more realistic, user-friendly, and effective environment
  - Shovel and Excavator Truck Spotting Enhancements – Improvements and configuration for optimal truck spotting positions
  - Wheel Loader Optimization – Kick out functionality improvements
  - Underground Loader Spillage – Assess operator efficiency more accurately by measuring spillage and clean up time
  - New Operator Error for Underground Cable Bolters and Drills

- **Increased Autonomous Functionality**
  - Komatsu FrontRunner® Autonomous System - support for ongoing version changes, more machines supported in autonomous simulation, enhanced functionality for Manual Haul Trucks, new events and errors
  - Cat® Command for Hauling - support for training for core autonomous functionality for Light Vehicle and Haul Truck operators

SimControl 2023.2

// PREMIUM GRAPHICS FOR ANCILLARY MACHINES
